Summary:

How Do You Know That Your Photos Are Secure?

If you are sharing your photos on the internet, you are at the risk of losing them. Someone would take the photos for their own using, or maliciously revised, you might never even know.

Watermark Software is a professional watermarking program for protecting online photos' copyright. It can add text watermark, image watermark, logo, and signature to photos without unauthorized use. Watermark Software also supports batch mode; the process of adding watermark to 500 pictures will take less than 1 minute.

Current versions have 150 free watermark materials you can use them freely.

Not only a watermarking tool, it also supports photo frames, batch resizing, photo cropping, etc.
